

## **Week 4: Finalising the report on the glucocorticoid receptor dynamics**

During this week you will give feedback on other students' R script of the glucocorticoid receptor model and you will finalize the report on the glucocorticoid receptor model.

### **Assignment 1**

This week you first will correct the R script of week 3 written by one of the other couples. You should write a short (around 300-400 words) note, assessing the script and giving feedback. Use the theme08\_rubric to conduct the assessment

Share your notes with the group you assessed

### **Assignment 2**

Based on the input of another couples assessment note improve your script of week 3. Furthermore finalize the report on the glucocorticoid receptor dynamics. Include Introduction, Methods section, Results and discussion. Make sure that you describe all the results in words and include relevant figures. Write also a short discussion. Include the R script in your report.
